

COVID-19 On-Campus Protocols

The following things are no longer required:

- Masks
- Screenings at drop off
- Desk dividers
- Six feet distancing

Regular hand-washing will still be encouraged. Staff will still perform regular cleaning and disinfecting.

Students and staff should continue to stay home when they are sick.

- If a student or staff member leaves school with COVID symptoms, they will need to remain home until symptoms are gone - even with a negative test.
- When a student has regular allergies or something else that can present symptoms similar to COVID, it is recommended that the parents work out a plan with their pediatrician to manage symptoms while at school.

In the event of a COVID positive case on campus:

- Student or staff member will be sent home.
- Anybody considered a close contact will be contacted.
- DOH guidelines no longer require a person to quarantine after exposure. It is recommended that the older student or adult wear a mask for 10 days after exposure as a precaution.
- A close contact who develops symptoms should get tested and remain at home.
